Absorption, suture, in rabbit cornea and sclera: Enzyme histochemical and morphologic observations (Salthouse et al.), 844

Abstracts, Atlantic Section, 156
Fall National Meeting, Joint Meeting with National Society for Prevention of Blindness, 977
Pacific Section, 979

Accommodation in guanethidine-treated monkeys, effect of cervical sympathetic stimulation on (Törnqvist), 765

Acid(s), amino, from lens, efflux of (Kern), 692
complex, polyinosinic-polycytidylic, influence of, on vaccinia keratitis in rabbits (Chowchuvech et al.), 716
of rabbit eye tissue cultures infected with herpes simplex virus. Effect of neomycin and virus challenge dose, protection by (Weissenbacher et al.), 857
lens fatty, composition during galactose cataract formation, changes in (Hatcher and Andrews), 801

Adaptation, subsequent dark, retinal illumination during indirect ophthalmoscopy (Dawson and Herron), 89

Adrenergic terminals, degeneration mydriasis and hyperemia of iris after superior cervical ganglionectomy in rabbit. Evidence for release of more than norepinephrine during degeneration of (Treister and Bárány), 873

Albumin, ^{131}I-lymphatic drainage of, from vascularized cornea (Collin), 146

Alcohol, polyvinyl, and hydroxypropyl methylcellulose on intraocular penetration of topical fluorescein in man, effects of (Waltman and Patrowicz), 966

Amino acids, efflux of, from lens (Kern), 692

Angle-closure glaucoma, peripheral iridectomy for (Kirsch), 424

Announcements, 163, 245, 400, 476, 556, 647, 724, 826, 917, 985

Anomaloscopic settings with added chromatic fields: Use of red light to reproduce protan function (Smith and Pokorny), 543

Anterior chamber by bulk flow, decay kinetics of substances which leave (Kottler, Brubaker, and Macri), 758

Antibody in tears following intranasal vaccination with inactivated type 13 rhinovirus: Preliminary report, demonstration and characterization of (Knopf, Bertran, and Kapikian), 727

Aqueous and corneal concentrations, experimental band keratopathy electron microprobe x-ray analysis of (Doughman, Ingram, and Bourne), 471
dynamics in man, effects of topical isoproterenol on (Drance and Ross), 424
withdrawal in rabbits, protein release during (Neupert and Lawrence), 865

Argon laser radiation. I. Retinal damage threshold studies, ocular effects of (Bresnick et al.), 901

Autoradiographic studies on metabolism of retinal pigment epithelium (Young and Bok), 524

B

Band keratopathy electron microprobe x-ray analysis, experimental, of aqueous and corneal calcium concentrations (Doughman, Ingram, and Bourne), 471

Bedsonia isolated from patient with Reiter's syndrome, ocular infection of rabbits with (Ostler, Schachter, and Dawson), 256

Blood vessels, intraocular, effect of sympathetic stimulation on critical closure of (Best et al.), 911
ocular, ultrastructure of "tubular body" in endothelial cells of (Matsuda and Sugiura), 919

Book reviews, 160, 246, 648, 918

Bretylium, degeneration mydriasis and intraocular pressure decrease in conscious rabbit after unilateral cervical ganglionectomy, effect of (Treister and Bárány), 343

Bulk flow, decay kinetics of substances which leave anterior chamber by (Kottler, Brubaker, and Macri), 758

Buphthalmic and normal rabbits, comparison of corneal epithelium regeneration in (Harris et al.), 122

C

Calcification, corneal, in spontaneously diabetic mice (Mittl et al.), 137

Calibration, Schiøtz tonometer, re-evaluation of (Anderson and Grant), 430

Cataract(s) formation, galactose, changes in lens fatty acid composition during (Hatcher and Andrews), 801
galactose, of hamster, dulcitol and water concentration in (Hofeldt et al.), 300

Cataractogenic effect of Dibromomannitol in rats (von Sallmann and Grimes), 291

Cell(s), endothelial, of ocular blood vessels, ultrastructure of "tubular body" in (Matsuda and Sugiura), 919

*January, pp. 1-88; February, pp. 89-164; March, pp. 165-246; April, pp. 247-324; May, pp. 325-400; June, pp. 401-476; July, pp. 477-556; August, pp. 557-648; September, pp. 649-726; October, pp. 727-826; November, pp. 827-918; December, pp. 919-1004.

Cell(s)—Cont'd
visual, degeneration, oxygen-induced, in rabbit (Bresnick), 372
Cercopithecus ethiops, effect of oculomotor nerve stimulation on outflow facility and pupil diameter in monkey (Törnqvist), 220
Cerebellar influence on evoked potential of oculomotor nucleus induced by stimulation of oculomotor nerve branches in cat (Shimo-oku), 236
Cesium, potassium, and rubidium, studies on crystalline lens. XVI. Characterization of active transport and diffusion of (Kinsey and McLean), 769
Cervical ganglionectomy, superior, in rabbit. Evidence for release of more than norepinephrine during degeneration of adrenergic terminals, degeneration mydriasis and hyperemia of iris after (Treister and Bárány), 873
unilateral, mydriasis and intraocular pressure in conscious rabbit after (Treister and Bárány), 331
unilateral, effect of bretylium on degeneration mydriasis and intraocular pressure decrease in conscious rabbit after (Treister and Bárány), 343
sympathetic stimulation on accommodation in guanethidine-treated monkeys, effect of (Törnqvist), 765
Chamber, anterior, by bulk flow, decay kinetics of substances which leave (Kottler, Brubaker, and Macri), 758
measurements, anterior, on CO_2 laser corneal irradiation (MacKeen et al.), 366
Chloride ion transport in isolated ciliary body (Holland and Gipson), 20
II. Ion substitution experiments (Holland), 30
Chloroquine, acute toxic effects of, on cat retina (Berson), 618
Cholinesterase(s) of intact cat cornea, ciliary body, lens, and retina, analysis of (Mittag et al.), 742
technique, whole-mount, for demonstrating corneal nerves: Observations in albino rabbit (Robertson and Winkelmann), 710
Chromatic fields, added, anomaloscopic settings with: Use of red light to reproduce protan function (Smith and Pokorny), 543
Ciliary body–iris, rabbit, in vitro, proline transport by (Coben et al.), 949
isolated, chloride ion transport in (Holland and Gipson), 20
lens, retina, and intact cat cornea, analysis of cholinesterases of (Mittag et al.), 742
rabbit, intraocular transport of myoinositol. I. Accumulation in (Reddy, Varma, and Chakrapani), 785
Closure, critical, of intraocular blood vessels, effect of sympathetic stimulation on (Best et al.), 911
Complement components and their inactivators in intraocular fluids of guinea pig (Shimada), 307
Cornea, intact cat, ciliary body, lens, and retina, analysis of cholinesterases of (Mittag et al.), 742
rabbit, endothelial lesions of, produced by herpes simplex virus (Oh), 196
scanning and transmission electron microscopic observations of topographic anatomy of dendritic lesions in (Spencer and Hayes), 183
and sclera, rabbit: Enzyme histochemical and morphologic observations, suture absorptions in (Salthouse et al.), 844
vascularized, lymphatic drainage of ^{131}I-albumin from (Collin), 146
Corneal and aqueous concentrations, experimental band keratopathy electron microprobe x-ray analysis of (Doughman, Ingram, and Bourne), 471
calcification in spontaneously diabetic mice (Mittl et al.), 137
endothelium, during experimental uveitis, fine structural alterations of (Inomata and Smelser), 272
graft rejection, fine structural changes in (Inomata, Smelser, and Polack), 263
epithelium. Comparison of "dry" and vitamin A-deficient eye, induction of keratinization in (Beitch), 827
regeneration in normal and buphthalmic rabbits, comparison of (Harris et al.) 122
irradiation, CO_2 laser, anterior chamber measurements on (MacKeen et al.), 366
nerves, whole-mount cholinesterase technique for demonstrating: Observations in albino rabbit (Robertson and Winkelmann), 710
stroma, nonswelling, of dogfish shark, glycosaminoglycans in (Praus and Goldman), 131
uneven swelling of (Kikkawa and Hirayama), 735
ultrastructure, changes in, resulting from early lens removal in developing chick embryo (Zinn), 165
vessels, rat, structure, in advanced stages of wound healing (Szalay and Pappas), 354
wound healing. I. Inhibition of stromal healing by three dexamethasone derivatives (McDonald et al.), 703
Corticosteroid provocative testing (LeBlanc, Stewart, and Becker), 946
Crystalline lens, active transport by: Myo-inositol (Cotlier), 681

XUM

Crystalline lens—Cont'd
XVI. Characterization of active transport and diffusion of potassium, rubidium, and cesium, studies on (Kinsey and McLean), 769
Crystals, intralysosomal cystine, in cystinosis (Wong et al.), 83
Culture(s), rabbit eye tissue, infected with herpes simplex virus. Effect of neomycin and virus challenge dose, protection by polyinosinic-polycytidylic acid complex of (Weissenbacher et al.), 857
tissue, studies, of embryonal chicken retina (Barr-Nea and Barishak), 447
Cyanoacrylate monomer tissue adhesive analogues, ocular tolerance to (Gassett et al.), 3
Cystine crystals, intralysosomal, in cystinosis (Wong et al.), 83
Cystinosis, intralysosomal cystine crystals in (Wong et al.), 83

D

Decapsulation on ion movements across lens of toad, *Bufo marinus*. Influence on drug actions, effects of (Toyofuko and Bentley), 959
Decay curves and ocular rigidity analyzed by two nonlinear systems (Lyon, McEwen, and Shepherd), 935
kinetics of substances which leave anterior chamber by bulk flow (Kottler, Brubaker, and Macri), 758
Degeneration mydriasis and hyperemia of iris after superior cervical ganglionectomy in rabbit. Evidence for release of more than norepinephrine during degeneration of adrenergic terminals (Treister and Bárány), 873
and intraocular pressure decrease in conscious rabbit after unilateral cervical ganglionectomy, effect of bretylium on (Treister and Bárány), 343
visual cell, oxygen-induced, in rabbit (Bresnick), 372
Dendritic lesions in rabbit cornea, scanning and transmission electron microscopic observations of topographic anatomy of (Spencer and Hayes), 183
Dexamethasone derivatives, three, inhibition of stromal healing by. I. Corneal wound healing (McDonald et al.), 703
testing in Southwestern Indians (Rosenbaum, Alton, and Becker), 325
Diabetic mice, spontaneously, corneal calcification in (Mittl et al.), 137
Diameter, pupil, and outflow facility in monkey (*Cercopithecus ethiops*), effect of oculomotor nerve stimulation on (Törnqvist), 220
Diamide on lens glutathione and lens membrane function, effect of (Epstein and Kinoshita), 629
Dibromomannitol in rats, cataractogenic effect of (von Sallmann and Grimes), 291
Diffusion and active transport of potassium, rubidium, and cesium, studies on crystalline lens. XVI. Characterization of (Kinsey and McLean), 769
Drainage, lymphatic, of ^{131}I-albumin from vascularized cornea (Collin), 146
Drugs, topical, use of hydrophilic contact lenses to increase ocular penetration of (Waltman and Kaufman), 250
"Dry" and vitamin A-deficient eye, induction of keratinization in corneal epithelium. Comparison of (Beitch), 827
Dulcitol and water concentration in galactose cataracts of hamster (Hofeldt et al.), 300
Dysplasia, radiation-induced retinal, pathogenesis of (Shively et al.), 888

E

EER. III. Further contribution to origin of EER, electrically evoked response of visual system (Potts and Inoue), 814
Efferent innervation of retina. II. Morphologic study of monkey retina (Honrubia and Elliott), 971
Efflux of amino acids from the lens (Kern), 692
Electrically evoked response of visual system (EER). III. Further contribution to origin of EER (Potts and Inoue), 814
Electromyography, what can, do for ophthalmologist (Jampolsky), 570
Electron microprobe x-ray analysis, experimental band keratopathy, of aqueous and corneal calcium concentrations (Doughman, Ingram, and Bourne), 471
microscopic observations, scanning and transmission, of topographic anatomy of dendritic lesions in rabbit cornea (Spencer and Hayes), 183
microscopy of cultured mammalian lenses (Reddan et al.), 496
Electro-oculogram and electroretinogram: Clinical applications (Krill), 600
Electroretinogram and electro-oculogram: Clinical applications (Krill), 600
human, effect of variations of stimulus rise time on (Burian), 410
Electroretinography: Some basic principles (Gouras), 557
Embryo, developing chick, changes in corneal ultrastructure resulting from early lens removal in (Zinn), 165
Embryonal chicken retina, tissue culture studies of (Barr-Nea and Barishak), 447
Endothelial cells of ocular blood vessels, ultrastructure of "tubular body" in (Matsuda and Sugiura), 919

Endothelial cells—Cont'd
lesions of rabbit cornea produced by herpes simplex virus (Oh), 196
Endothelium, corneal, during experimental uveitis, fine structural alterations of (Inomata and Smelser), 272
graft rejection, fine structural changes in (Inomata, Smelser, and Polack), 263
Enzyme histochemical and morphologic observations, suture absorption in rabbit cornea and sclera (Salthouse et al.), 844
Epithelium, corneal. Comparison of "dry" and vitamin A-deficient eye, induction of keratinization in (Beitch), 827
regeneration in normal and buphthalmic rabbits, comparison of (Harris et al.), 122
lens, of rabbits after x-irradiation, histochemical changes in (Richards, Schocket, and Michaelis), 116
retinal pigment, autoradiographic studies on metabolism of (Young and Bok), 524
Erbium, Q-switched, laser, ocular hazards of (Lund et al.), 463
Eye, "dry" and vitamin A-deficient, induction of keratinization in corneal epithelium. Comparison of (Beitch), 827
mammalian, isolated perfused, retinal function in (Gouras and Hoff), 388
tissue cultures, rabbit, infected with herpes simplex virus. Effect of neomycin and virus challenge dose, protection by polyinosinic-polycytidylic acid complex of (Weissenbacher et al.), 857
Extraocular muscles, myasthenic, fine structure of neuromuscular junctions in (Sakimoto and Cheng-Minoda), 316
Exercise on intraocular pressure. I. Human beings, effect of (Marcus et al.), 749
II. Rabbits, effect of (Marcus et al.), 753

F

Facility, outflow, and pupil diameter in monkey (*Cercopithecus ethiops*), effect of oculomotor nerve stimulation on (Törnqvist), 220
true, and pseudofacility, measurement of, by constant pressure perfusion in normal rhesus monkey eye (Brubaker), 42
Fatty acid, lens, composition during galactose cataract formation, changes in (Hatcher and Andrews), 801
Flow, bulk, decay kinetics of substances which leave anterior chamber by (Kottler, Brubaker, and Macri), 758
Fluids, intraocular, of guinea pig, complement components and their inactivators in (Shimada), 307
Fluorescein, topical, in man, effects of hydroxypropyl methylcellulose and polyvinyl alcohol on intraocular penetration of (Waltman and Patrowicz), 966
Fluorophotometer, slit lamp, new objective (Waltman and Kaufman), 247
Friedenwald Award, presentation of to Dr. John E. Dowling (Maumenee), 650
remarks on acceptance of (Dowling), 652
Function, protan, use of red light to reproduce: Anomaloscopic settings with added chromatic fields (Smith and Pokorny), 543

G

Galactose cataract(s) formation, changes in lens fatty acid composition during (Hatcher and Andrews), 801
Galactose cataracts—Cont'd
of hamster, dulcitol and water concentration in (Hofeldt et al.), 300
Ganglionectomy, superior cervical, in rabbit. Evidence for release of more than norepinephrine during degeneration of adrenergic terminals, degeneration mydriasis and hyperemia of iris after (Treister and Bárány), 873
unilateral, mydriasis and intraocular pressure in conscious rabbit after (Treister and Bárány), 331
unilateral, effect of bretylium on degeneration mydriasis and intraocular pressure decrease in conscious rabbit after (Treister and Bárány), 343
Glaucoma, angle-closure, peripheral iridectomy for (Kirsch), 424
clinic, visual loss in, sociological considerations (Spaeth), 73
hyperosmotic agents in (Kolker), 418
Glaucomatous and normal eyes, optic cup in (Armaly), 425
Glycosaminoglycans in nonswelling corneal stroma of dogfish shark (Praus and Goldman), 131
Graft rejection, fine structural changes in corneal endothelium during (Inomata, Smelser, and Polack), 263
Guanethidine-treated monkeys, effect of cervical sympathic stimulation on accommodation in (Törnqvist), 765

H

Healing, corneal wound. I. Inhibition of stromal healing by three dexamethasone derivatives (McDonald et al.), 703
stromal, inhibition of by three dexamethasone derivatives. I. Corneal wound healing (McDonald et al.), 703

XUM

Herpes simplex virus. Effect of neomycin and virus challenge dose, protection by polyinosinic-polycytidylic acid complex of rabbit eye tissue cultures infected with (Weissenbacher et al.), 857
endothelial lesions of rabbit cornea produced by (Oh), 196
Histochemical changes in lens epithelium of rabbits after x-irradiation (Richards, Schocket, and (Michaelis), 116
Histologic evaluation of ophthalmoscopically subvisible retinal laser exposures (Lappin and Coogan), 537
Holographic recording of retina using continuous wave laser (Calkins and Leonard), 458
Hydrophilic contact lenses, use of, to increase ocular penetration of topical drugs (Waltman and Kaufman), 250
Hydroxypropyl methylcellulose and polyvinyl alcohol on intraocular penetration of topical fluorescein in man, effects of (Waltman and Patrowicz), 966
Hyperemia and degeneration mydriasis of iris after superior cervical ganglionectomy in rabbit. Evidence for release of more than norepinephrine during degeneration of adrenergic terminals (Treister and Bárány), 873
Hyperosmotic agents in glaucoma (Kolker), 418

I

^{131}I-albumin, from vascularized cornea, lymphatic drainage of (Collin), 146
Illumination, retinal, during indirect ophthalmoscopy, subsequent dark adaptation (Dawson and Herron), 89
Immune response, studies on intravitreal initiation of (Pribnow and Hall), 639
Indians, Southwestern, dexamethasone testing in (Rosenbaum, Alton, and Becker), 325
Induction of keratinization in corneal epithelium. Comparison of "dry" and vitamin A-deficient eye (Beitch), 827
Infection, ocular, of rabbits with Bedsonia isolated from patient with Reiter's syndrome (Ostler, Schachter, and Dawson), 256
Inhibition of stromal healing by three dexamethasone derivatives. I. Corneal wound healing (McDonald et al.), 703
Initiation, intravitreal, of immune response, studies on (Pribnow and Hall), 639
Innervation, efferent, of retina. II. Morphologic study of monkey retina (Honrubia and Elliott), 971
Intralysosomal cystine crystals in cystinosis (Wong et al.), 83
Intraocular blood vessels, effect of sympathetic stimulation on critical closure of (Best et al.), 911
fluids of guinea pig, complement components and their inactivators in (Shimada), 307
penetration of topical fluorescein in man, effects of hydroxypropyl methylcellulose and polyvinyl alcohol on (Waltman and Patrowicz), 966
pressure decrease and degeneration mydriasis in conscious rabbit after unilateral cervical ganglionectomy, effect of bretylium on (Treister and Bárány), 343
I. Human beings, effect of exercise on (Marcus et al.), 749
and mydriasis, in conscious rabbit after unilateral superior cervical ganglionectomy (Treister and Bárány), 331
II. Rabbits, effect of exercise on (Marcus et al.), 753
Intraocular—Cont'd
transport of myoinositol. I. Accumulation in rabbit ciliary body (Reddy, Varma, and Chakrapani), 785
II. Accumulation in rabbit lens in vitro (Varma, Chakrapani, and Reddy), 794
of taurine, studies on, accumulation in rabbit lens (Reddy), 206
Intranasal vaccination with inactivated type 13 rhinovirus: Preliminary report, demonstration and characterization of antibody in tears following (Knopf, Bertran, and Kapikian), 727
Intravitreal initiation of immune response, studies on (Pribnow and Hall), 639
Ion, chloride, transport in isolated ciliary body (Holland and Gipson), 20
movements across lens of toad, *Bufo marinus*. Influence on drug actions, effects of decapsulation on (Toyofuko and Bentley), 959
substitution experiments, chloride ion transport in isolated ciliary body (Holland), 30
Iridectomy, peripheral, for angle-closure glaucoma (Kirsch), 424
Iris-ciliary body, rabbit, in vitro, proline transport by (Coben et al.), 949
after superior cervical ganglionectomy in rabbit. Evidence for release of more than norepinephrine during degeneration of adrenergic terminals, degeneration mydriasis and hyperemia of (Treister and Bárány), 873
Irradiation, corneal, CO_2 laser, anterior chamber measurements on (MacKeen et al.), 366
Isolated ciliary body, chloride ion transport in (Holland and Gipson), 20

Isolated—Cont'd
perfused mammalian eye, retinal function in (Gouras and Hoff), 388
Isoproterenol, topical, effects on aqueous dynamics in man (Drance and Ross), 424

J

Junctions, neuromuscular, in myasthenic extraocular muscles, fine structure of (Sakimoto and Cheng-Minoda), 316

K

Keratinization in corneal epithelium. Comparison of "dry" and vitamin A-deficient eye, induction of (Beitch), 827
Keratitis, vaccinia, in rabbits, influence of polyinosinic-polycytidylic acid complex on (Chowchuvech et al.), 716
Keratopathy, experimental band, electron microprobe x-ray analysis of aqueous and corneal calcium concentrations (Doughman, Ingram, and Bourne), 471
Kinetics, decay, of substances which leave anterior chamber by bulk flow (Kottler, Brubaker, and Macri), 758

L

Laser, CO_2, corneal irradiation, anterior chamber measurements on (MacKeen et al.), 366
continuous wave, holographic recording of retina using (Calkins and Leonard), 458
damage to retina, thermal and mechanical mechanisms in (Marshall), 97
exposures, ophthalmoscopically subvisible retinal, histologic evaluation of (Lappin and Coogan), 537
radiation, argon. I. Retinal damage threshold studies, ocular effects of (Bresnick et al.) 901
Q-switched erbium, ocular hazards of (Lund et al.), 463
Lens(es), bovine tRNA methylases in (Kerr and Dische), 286
contact, hydrophilic, use of, to increase ocular penetration of topical drugs (Waltman and Kaufman), 250
crystalline, active transport by: Myo-inositol (Cotlier), 681
XVI. Characterization of active transport and diffusion of potassium, rubidium, and cesium, studies on (Kinsey and McLean), 769
efflux of amino acids from (Kern), 692
epithelium of rabbits after x-irradiation, histochemical changes in (Richards, Schocket, and Michaelis), 116
fatty acid composition during galactose cataract formation, changes in (Hatcher and Andrews), 801
glutathione and lens membrane function, effect of diamide on (Epstein and Kinoshita), 629
cultured mammalian, electron microscopy of (Reddan et al.), 496
membrane function and, lens glutathione, effect of diamide on (Epstein and Kinoshita), 629
rabbit, accumulation in, studies on intraocular transport of taurine (Reddy), 206
in vitro, intraocular transport of myoinositol. II. Accumulation in (Varma, Chakrapani, and Reddy), 794
removal, early, in developing chick embryo, changes in corneal ultrastructure resulting from (Zinn), 165
retina, intact cat cornea, and ciliary body, analysis of cholinesterases of (Mittag et al.), 742
of toad, *Bufo marinus*. Influence on drug actions, effects of decapsulation on ion movements across (Toyofuko and Bentley), 959
Lesions, dendritic in rabbit cornea, scanning and transmission electron microscopic observations of topographic anatomy of (Spencer and Hayes), 183
endothelial, of rabbit cornea produced by herpes simplex virus (Oh), 196
Light, red, use of to reproduce protan function: Anomaloscopic settings with added chromatic fields (Smith and Pokorny), 543
Lymphatic drainage of ^{131}I-albumin from vascularized cornea (Collin), 146

M

Measurements, anterior chamber, on CO_2 laser corneal irradiation (MacKeen et al.), 366
Mechanical and thermal mechanisms in laser damage to retina (Marshall), 97
Membrane properties and structure of frog nictitans (Lande and Zadunaisky), 477
Metabolism of retinal pigment epithelium, autoradiographic studies on (Young and Bok), 524
Methylases, tRNA, in bovine lens (Kerr and Dische), 286
Methylcellulose, hydroxypropyl, and polyvinyl alcohol on intraocular penetration of topical fluorescein in man, effects of (Waltman and Patrowicz), 966
Microprobe, electron, x-ray analysis, experimental band keratopathy, of aqueous and corneal calcium concentrations (Doughman, Ingram, and Bourne), 471
Microscopic observations, scanning and transmission electron, of topographic anatomy of dendritic lesions in rabbit cornea (Spencer and Hayes), 183
Microscopy, electron, of cultured mammalian lenses (Reddan et al.), 496

XUM

Midbrain evoked potential produced by stimulation of muscle branch of oculomotor nerve (Shimo-oku), 226
Monochromat, blue monocone, threshold measurements of spectral sensitivity in (Pokorny, Smith, and Swartley), 807
Monocone monochromat, blue, threshold measurements of spectral sensitivity in (Pokorny, Smith, and Swartley), 807
Monomer, cyanoacrylate, tissue adhesive, ocular tolerance to (Gassett et al.), 3
Morphologic study of monkey retina, efferent innervation of retina. II. (Honrubia and Elliott), 971
Muscle branch of oculomotor nerve, midbrain evoked potential produced by stimulation of (Shimo-oku), 226
extraocular, myasthenic, fine structure of neuromuscular junctions in (Sakimoto and Cheng-Minoda), 316
Myasthenic extraocular muscles, fine structure of neuromuscular junctions in (Sakimoto and Cheng-Minoda), 316
Mydriasis, degeneration, and hyperemia of iris after superior cervical ganglionectomy in rabbit. Evidence for release of more than norepinephrine during degeneration of adrenergic terminals (Treister and Bárány), 873
and intraocular pressure decrease in conscious rabbit after unilateral cervical ganglionectomy, effect of bretylium on (Treister and Bárány), 343
and intraocular pressure in conscious rabbit after unilateral superior cervical ganglionectomy (Treister and Bárány), 331
Myoinositol. I. Accumulation in rabbit ciliary body, intraocular transport of (Reddy, Varma, and Chakrapani), 785
II. Accumulation in rabbit lens in vitro, intraocular transport of (Varma, Chakrapani, and Reddy), 794
Active transport by the crystalline lens (Cotlier), 681
Myopia, experimental, in rabbits (Tokoro), 926

N

Neomycin and virus challenge dose, protection by polyinosinic-polycytidylic acid complex of rabbit eye tissue cultures infected with herpes simplex virus: Effect of (Weissenbacher et al.), 857
Nerve(s) branches, oculomotor, in cat, cerebellar influence on evoked potential of oculomotor nucleus induced by stimulation of (Shimo-oku), 236
corneal, whole-mount cholinesterase technique for demonstrating: Observations in albino rabbit (Robertson and Winkelmann), 710
oculomotor, midbrain evoked potential produced by stimulation of muscle branch of (Shimo-oku), 226
stimulation, effect of, on outflow facility and pupil diameter in monkey (*Cercopithecus ethiops*) (Törnqvist), 220
optic, transection and intraocular pressure response to various drugs (Podos, Krupin, and Becker), 492
Neuromuscular junctions in myasthenic extraocular muscles, fine structure of (Sakimoto and Cheng-Minoda), 316
Nictitans, frog, structure and membrane properties of (Lande and Zadunaisky), 477
Nonlinear systems, two, ocular rigidity and decay curves analyzed by (Lyon, McEwen, and Shepherd), 935
Norepinephrine during degeneration of adrenergic terminals, degeneration mydriasis and hyperemia of iris after superior cervical ganglionectomy in rabbit. Evidence for release of more than (Treister and Bárány), 873
Nucleus, oculomotor, cerebellar influence on evoked potential of, induced by stimulation of oculomotor nerve branches in cat (Shimo-oku), 236

O

Ocular blood vessels, ultrastructure of "tubular body" in endothelial cells of (Matsuda and Sugiura), 919
effects of argon laser radiation. I. Retinal damage threshold studies (Bresnick et al.), 901
hazards of Q-switched erbium laser (Lund et al.), 463
hypersensitivity, experimental, to polyepinephrine and its analogues (Aronson and Sassetti), 12
infection of rabbits with Bedsonia isolated from patient with Reiter's syndrome (Ostler, Schachter, and Dawson), 256
penetration of topical drugs, use of hydrophilic contact lenses to increase (Waltman and Kaufman), 250
rigidity and decay curves analyzed by two nonlinear systems (Lyon, McEwen, and Shepherd), 935
tolerance to cyanoacrylate monomer tissue adhesive analogues (Gassett et al.), 3
Oculomotor nerve midbrain evoked potential produced by stimulation of muscle branch of (Shimo-oku), 226
branches in cat, cerebellar influence on evoked potential of oculomotor nucleus induced by stimulation of (Shimo-oku, 236

Oculomotor nerve—Cont'd
stimulation, effect of, on outflow facility and pupil diameter in monkey *(Cercopithecus ethiops)* (Törnqvist), 220
nucleus, cerebellar influence on evoked potential of, induced by stimulation of oculomotor nerve branches in cat (Shimo-oku), 236
Ophthalmoscopy, indirect, retinal illumination during, subsequent dark adaptation (Dawson and Herron), 89
Optic cup in normal and glaucomatous eyes (Armaly), 425
nerve transection and intraocular pressure response to various drugs (Podos, Krupin, and Becker, 492
Outflow facility and pupil diameter in monkey *(Cercopithecus ethiops)*, effect of oculomotor nerve stimulation on (Törnqvist), 220
Oxygen-induced visual cell degeneration in rabbit (Bresnick), 372
uptake by canine uveal tissue: In vitro and in vivo methods compared (O'Rourke and Benson), 53

P

Pathogenesis of radiation-induced retinal dysplasia (Shively et al.), 888
Penetration, intraocular, of topical fluorescein in man, effects of hydroxypropyl methylcellulose and polyvinyl alcohol on (Waltman and Patrowicz), 966
ocular, of topical drugs, use of hydrophilic contact lenses to increase (Waltman and Kaufman), 250
Perfused, isolated mammalian eye, retinal function in (Gouras and Hoff), 388
Peripheral iridectomy for angle-closure glaucoma (Kirsch), 424
Pigment epithelium, retinal, autoradiographic studies on metabolism of (Young and Bok), 524
Pigmentosa, retinitis, sex-linked, early receptor potential in (Berson and Goldstein), 58
Polyepinephrine and its analogues, experimental ocular hypersensitivity to (Aronson and Sassetti), 12
Polyinosinic-polycytidylic acid complex, influence of, on vaccinia keratitis in rabbits (Chowchuvech et al.), 716
of rabbit eye tissue cultures infected with herpes simplex virus. Effect of neomycin and virus challenge dose, protection by (Weissenbacher et al.), 857
Polyvinyl alcohol and hydroxypropyl methylcellulose on intraocular penetration of topical fluorescein in man, effects of (Waltman and Patrowicz), 966
Potassium, rubidium, and cesium, studies on crystalline lens. XVI. Characterization of active transport and diffusion of (Kinsey and McLean), 769
Pressure, intraocular, decrease, and degeneration mydriasis in conscious rabbit after unilateral cervical ganglionectomy, effect of bretylium on (Treister and Bárány), 343
I. Human beings, effect of exercise on (Marcus et al.), 749
and mydriasis, in conscious rabbit after unilateral superior cervical ganglionectomy (Treister and Bárány), 331
II. Rabbits, effect of exercise on (Marcus et al.), 753
response to various drugs, optic nerve transection and (Podos, Krupin, and Becker), 492
perfusion, constant, in normal rhesus monkey eye, measurement of pseudofacility and true facility by (Brubaker), 42
Proctor Medal Award, remarks on acceptance (Burian), 403
presentation to Hermann Burian (von Noorden), 402
Program, October National Meeting, 722
Proline transport by rabbit ciliary body–iris in vitro (Coben et al.), 949
Protan function, anomaloscopic settings with added chromatic fields: Use of red light to reproduce (Smith and Pokorny), 543
Protein release during aqueous withdrawal in rabbits (Neupert and Lawrence), 865
Provocative testing, corticosteroid (LeBlanc, Stewart, and Becker), 946
Pseudofacility and true facility, measurement of, by constant pressure perfusion in normal rhesus monkey eye (Brubaker), 42
Publications (Dowling), 653
Pupil diameter and outflow facility in monkey *(Cercopithecus ethiops)*, effect of oculomotor nerve stimulation on (Törnqvist), 220

Q

Q-switched erbium laser, ocular hazards of (Lund et al.), 463

R

Radiation, argon laser. I. Retinal damage threshold studies, ocular effects of (Bresnick et al.), 901
-induced retinal dysplasia, pathogenesis of (Shively et al.), 888
Receptor potential, early, in sex-linked retinitis pigmentosa (Berson and Goldstein), 58
Recording, holographic, of retina using continuous wave laser (Calkins and Leonard), 458

XUM

Regeneration of corneal epithelium in normal and buphthalmic rabbits, comparison of (Harris et al.), 122
Reiter's syndrome, ocular infection of rabbits with Bedsonia isolated from patient with (Ostler, Schachter, and Dawson), 256
Rejection, graft, fine structural changes in corneal endothelium during (Inomata, Smelser, and Polack), 263
Retina(s), cat, acute toxic effects of chloroquine on (Berson), 618
embryonal chicken, tissue culture studies of (Barr-Nea and Barishak), 447
holographic recording of, using continuous wave laser (Calkins and Leonard), 458
intact cat cornea, ciliary body, and lens, analysis of cholinesterases of (Mittag et al.), 742
monkey, efferent innervation of retina. II. Morphologic study of (Honrubia and Elliott), 971
II. Morphologic study of monkey retina, efferent innervation of (Honrubia and Elliott), 971
thermal and mechanical mechanisms in laser damage to (Marshall), 97
vertebrate, organization of (Dowling), 655
Retinal damage threshold studies, ocular effects of argon laser radiation. I. (Bresnick et al.), 901
dysplasia, radiation-induced, pathogenesis of (Shively et al.), 888
function in isolated perfused mammalian eye (Gouras and Hoff), 388
illumination during indirect ophthalmoscopy, subsequent dark adaptation (Dawson and Herron), 89
Retinal—Cont'd
laser exposures, ophthalmoscopically subvisible, histologic evaluation of (Lappin and Coogan), 537
pigment epithelium, autoradiographic studies on metabolism of (Young and Bok), 524
rods, distribution and renewal of RNA in (Bok), 516
Retinitis pigmentosa, sex-linked, early receptor potential in (Berson and Goldstein), 58
Retinoblastoma, human, tissue culture study of (Albert, Rabson, and Dalton), 64
Rhesus monkey eye, normal, measurement of pseudofacility and true facility by constant pressure perfusion in Brubaker), 42
Rhinovirus, inactivated type 13: Preliminary report, demonstration and characterization of antibody in tears following intranasal vaccination with (Knopf, Bertran, and Kapikian), 727
Rigidity, ocular, and decay curves analyzed by two nonlinear systems (Lyon, McEwen, and Shepherd), 935
RNA, distribution and renewal of, in retinal rods (Bok), 516
Rods, retinal, distribution and renewal of RNA in (Bok), 516
Rubidium, cesium, and potassium, studies on crystalline lens. XVI. Characterization of active transport and diffusion of (Kinsey and McLean), 769

S

von Sallmann, Ludwig (Kaufman), 1
Scanning and transmission electron microscopic observations of topographic anatomy of dendritic lesions in rabbit cornea (Spencer and Hayes), 183
Schiøtz tonometer calibration, reevaluation of (Anderson and Grant), 430
Sclera and cornea, rabbit: Enzyme histochemical and morphologic observations, suture absorption in (Salthouse et al.), 844
Sensitivity, spectral, in blue monocone monochromat, threshold measurements of (Pokorny, Smith, and Swartley), 807
Sex-linked retinitis pigmentosa, early receptor potential in (Berson and Goldstein), 58
Slit lamp fluorophotometer, new objective (Waltman and Kaufman), 247
Sociological considerations, visual loss in glaucoma clinic (Spaeth), 73
Spectral sensitivity in blue monocone monochromat, threshold measurements of (Pokorny, Smith, and Swartley), 807
Stiles-Crawford effect, movement of (Safir, Hyams, and Philpot), 820
Stimulation, cervical sympathetic, on accommodation in guanethidine - treated monkeys (Törnqvist), 765
sympathetic, on critical closure of intraocular blood vessels, effect of (Best et al.), 911
Stimulus rise time, effect of variations on human electroretinogram (Burian), 410
Stroma, corneal, uneven swelling of (Kikkawa and Hirayama), 735
nonswelling corneal, of dogfish shark, glycosaminoglycans in (Praus and Goldman), 131
Stromal healing, inhibition of, by three dexamethasone derivatives. I. Corneal wound healing (McDonald et al.), 703
Structure and membrane properties of frog nictitans (Lande and Zadunaisky), 477

Substitution, ion, experiments, chloride ion transport in isolated ciliary body (Holland), 30
Suture absorption in rabbit cornea and sclera: Enzyme histochemical and morphologic observations (Salthouse et al.), 844
Swelling, uneven, of corneal stroma, (Kikkawa and Hirayama), 735
Sympathetic stimulation, cervical, on accommodation in guanethidine - treated monkeys, effect of (Törnqvist), 765
on critical closure of intraocular blood vessels, effect of (Best et al.), 911
Syndrome, Reiter's, ocular infection of rabbits with Bedsonia isolated from patient with (Ostler, Schachter, and Dawson), 256

T

Taurine, intraocular transport of, studies on, accumulation in rabbit, lens (Reddy), 206
Tears following intranasal vaccination with inactivated type 13 rhinovirus: Preliminary report, demonstration and characterization of antibody in (Knopf, Bertran, and Kapikian), 727
Terminals, adrenergic, degeneration mydriasis and hyperemia of iris after superior cervical ganglionectomy in rabbit. Evidence for release of more than norepinephrine during degeneration of (Treister and Bárány), 873
Testing, dexamethasone, in Southwestern Indians (Rosenbaum, Alton, and Becker), 325
Thermal and mechanical mechanisms in laser damage to retina (Marshall), 97
Threshold measurements of spectral sensitivity in blue monocone monochromat (Pokorny, Smith, and Swartley), 807
studies, retinal damage, ocular effects of argon laser radiation. I. (Bresnick et al.), 901
Tissue culture studies of embryonal chicken retina (Barr-Nea and Barishak), 447
of human retinoblastoma (Albert, Rabson, and Dalton), 64
Tolerance, ocular, to cyanoacrylate monomer tissue adhesive analogues (Gassett et al.), 3
Tonometer, Schiøtz, calibration, re-evaluation of (Anderson and Grant), 430
Topographic anatomy of dendritic lesions in rabbit cornea, scanning and transmission electron microscopic observations of (Spencer and Hayes), 183
Toxic effects, acute, of chloroquine on cat retina (Berson), 618
Transmission and scanning electron microscopic observations of topographic anatomy of dendritic lesions in rabbit cornea (Spencer and Hayes), 183
Transport, active, by crystalline lens: Myo-inositol (Cotlier), 681
and diffusion of potassium, rubidium, and cesium, studies on crystalline lens. XVI. Characterization of (Kinsey and McLean), 769
intraocular, of myoinositol. I. Accumulation in rabbit ciliary body (Reddy, Varma, and Chakrapani), 785
II. Accumulation in rabbit lens in vitro (Varma, Chakrapani, and Reddy), 794
proline, by rabbit ciliary body–iris in vitro (Coben et al.), 949
Transection, optic nerve, and intraocular pressure response to various drugs (Podos, Krupin, and Becker), 492
tRNA methylases in bovine lens (Kerr and Dische), 286
"Tubular body" in endothelial cells of ocular blood vessels, ultrastructure of (Matsuda and Sugiura), 919

U

Ultrastructure, corneal, changes in, resulting from early lens removal in developing chick embryo (Zinn), 165
of "tubular body" in the endothelial cells of ocular blood vessels (Matsuda and Sugiura), 919
Uveal tissue, canine, oxygen uptake by, in vitro and in vivo methods compared (O'Rourke and Benson), 53
Uveitis, experimental, fine structural alterations of corneal endothelium during (Inomata and Smelser), 272

V

Vaccination, intranasal, with inactivated type 13 rhinovirus: Preliminary report, demonstration and characterization of antibody in tears following (Knopf, Bertran, and Kapikian), 727
Vaccinia keratitis in rabbits, influence of polyinosinic-polycytidylic acid complex on (Chowchuvech et al.), 716
Vascularized cornea, lymphatic drainage of ^{131}I-albumin from (Collin), 146
Vertebrate retinas, organization of (Dowling), 655
Vessels, corneal, rat, structure, in advanced stages of wound healing (Szalay and Pappas), 354

XUM

Virus challenge dose and neomycin, protection by polyinosinic - polycytidylic acid complex of rabbit eye tissue cultures infected with herpes simplex virus: Effect of (Weissenbacher et al.), 857
herpes simplex. Effect of neomycin and virus challenge dose, protection by polyinosinic-polycytidylic acid complex of rabbit eye tissue cultures infected with (Weissenbacher et al.), 857
endothelial lesions of rabbit cornea produced by (Oh), 196
Visual cell degeneration, oxygen-induced, in rabbit (Bresnick) 372
Visual—Cont'd
loss in glaucoma clinic, sociological considerations (Spaeth), 73
system (EER). III. Further contribution to origin of EER, electrically evoked response of (Potts and Inoue), 814
Vitamin A-deficient and "dry" eye, induction of keratinization in corneal epithelium. Comparison of (Beitch), 827

W

Water concentration and dulcitol in galactose cataracts of hamster (Hofeldt et al.), 300
Wave laser, continuous, holographic recording of retina using (Calkins and Leonard), 458
Whole-mount cholinesterase technique for demonstrating corneal nerves: Observations in albino rabbit (Robertson and Winkelmann), 710
Wound, corneal, healing. I. Inhibition of stromal healing by three dexamethasone derivatives (McDonald et al.), 703
healing, fine structure of rat corneal vessels in advanced stages of (Szalay and Pappas), 354

X

X-ray analysis, experimental band keratopathy electron microprobe, of aqueous and corneal calcium concentrations (Doughman, Ingram, and Bourne), 471

XUM
